Building & Construction Materials Trading

تجارة مواد البناء

Company Overview

BHMK Building Materials Trading started in an effort to address the growing demand for high-quality, sustainable construction material products in UAE & GCC market. With rapid changes in the construction industry environment, changes in the ways of supplying of the materials are also required. Construction materials nowadays should use the highest and latest technologies in their development in order to be sustainable, low-cost and efficient.

BHMK building materials found a large gap in the market for quality building material supply and support locally as well as within the region. BHMK have been successful in supplying to various small and large scale projects, including some of the most iconic constructions in Dubai & Abu Dhabi that regionally and globally are recognized as the gold standard of building development both in terms of architectural design, engineering and quality.

Mission

Our mission is to provide the highest quality of services and products with the most competitive prices to our customers. Offering world class customer support and using the fastest and most efficient methods of supply chain solutions to bring products to the hands of our customers rapidly from various parts of the world.

The core business of BHMK focuses on sourcing and supplying building materials, construction supplies, industrial consumables and other general items related to building constructions.

Vision

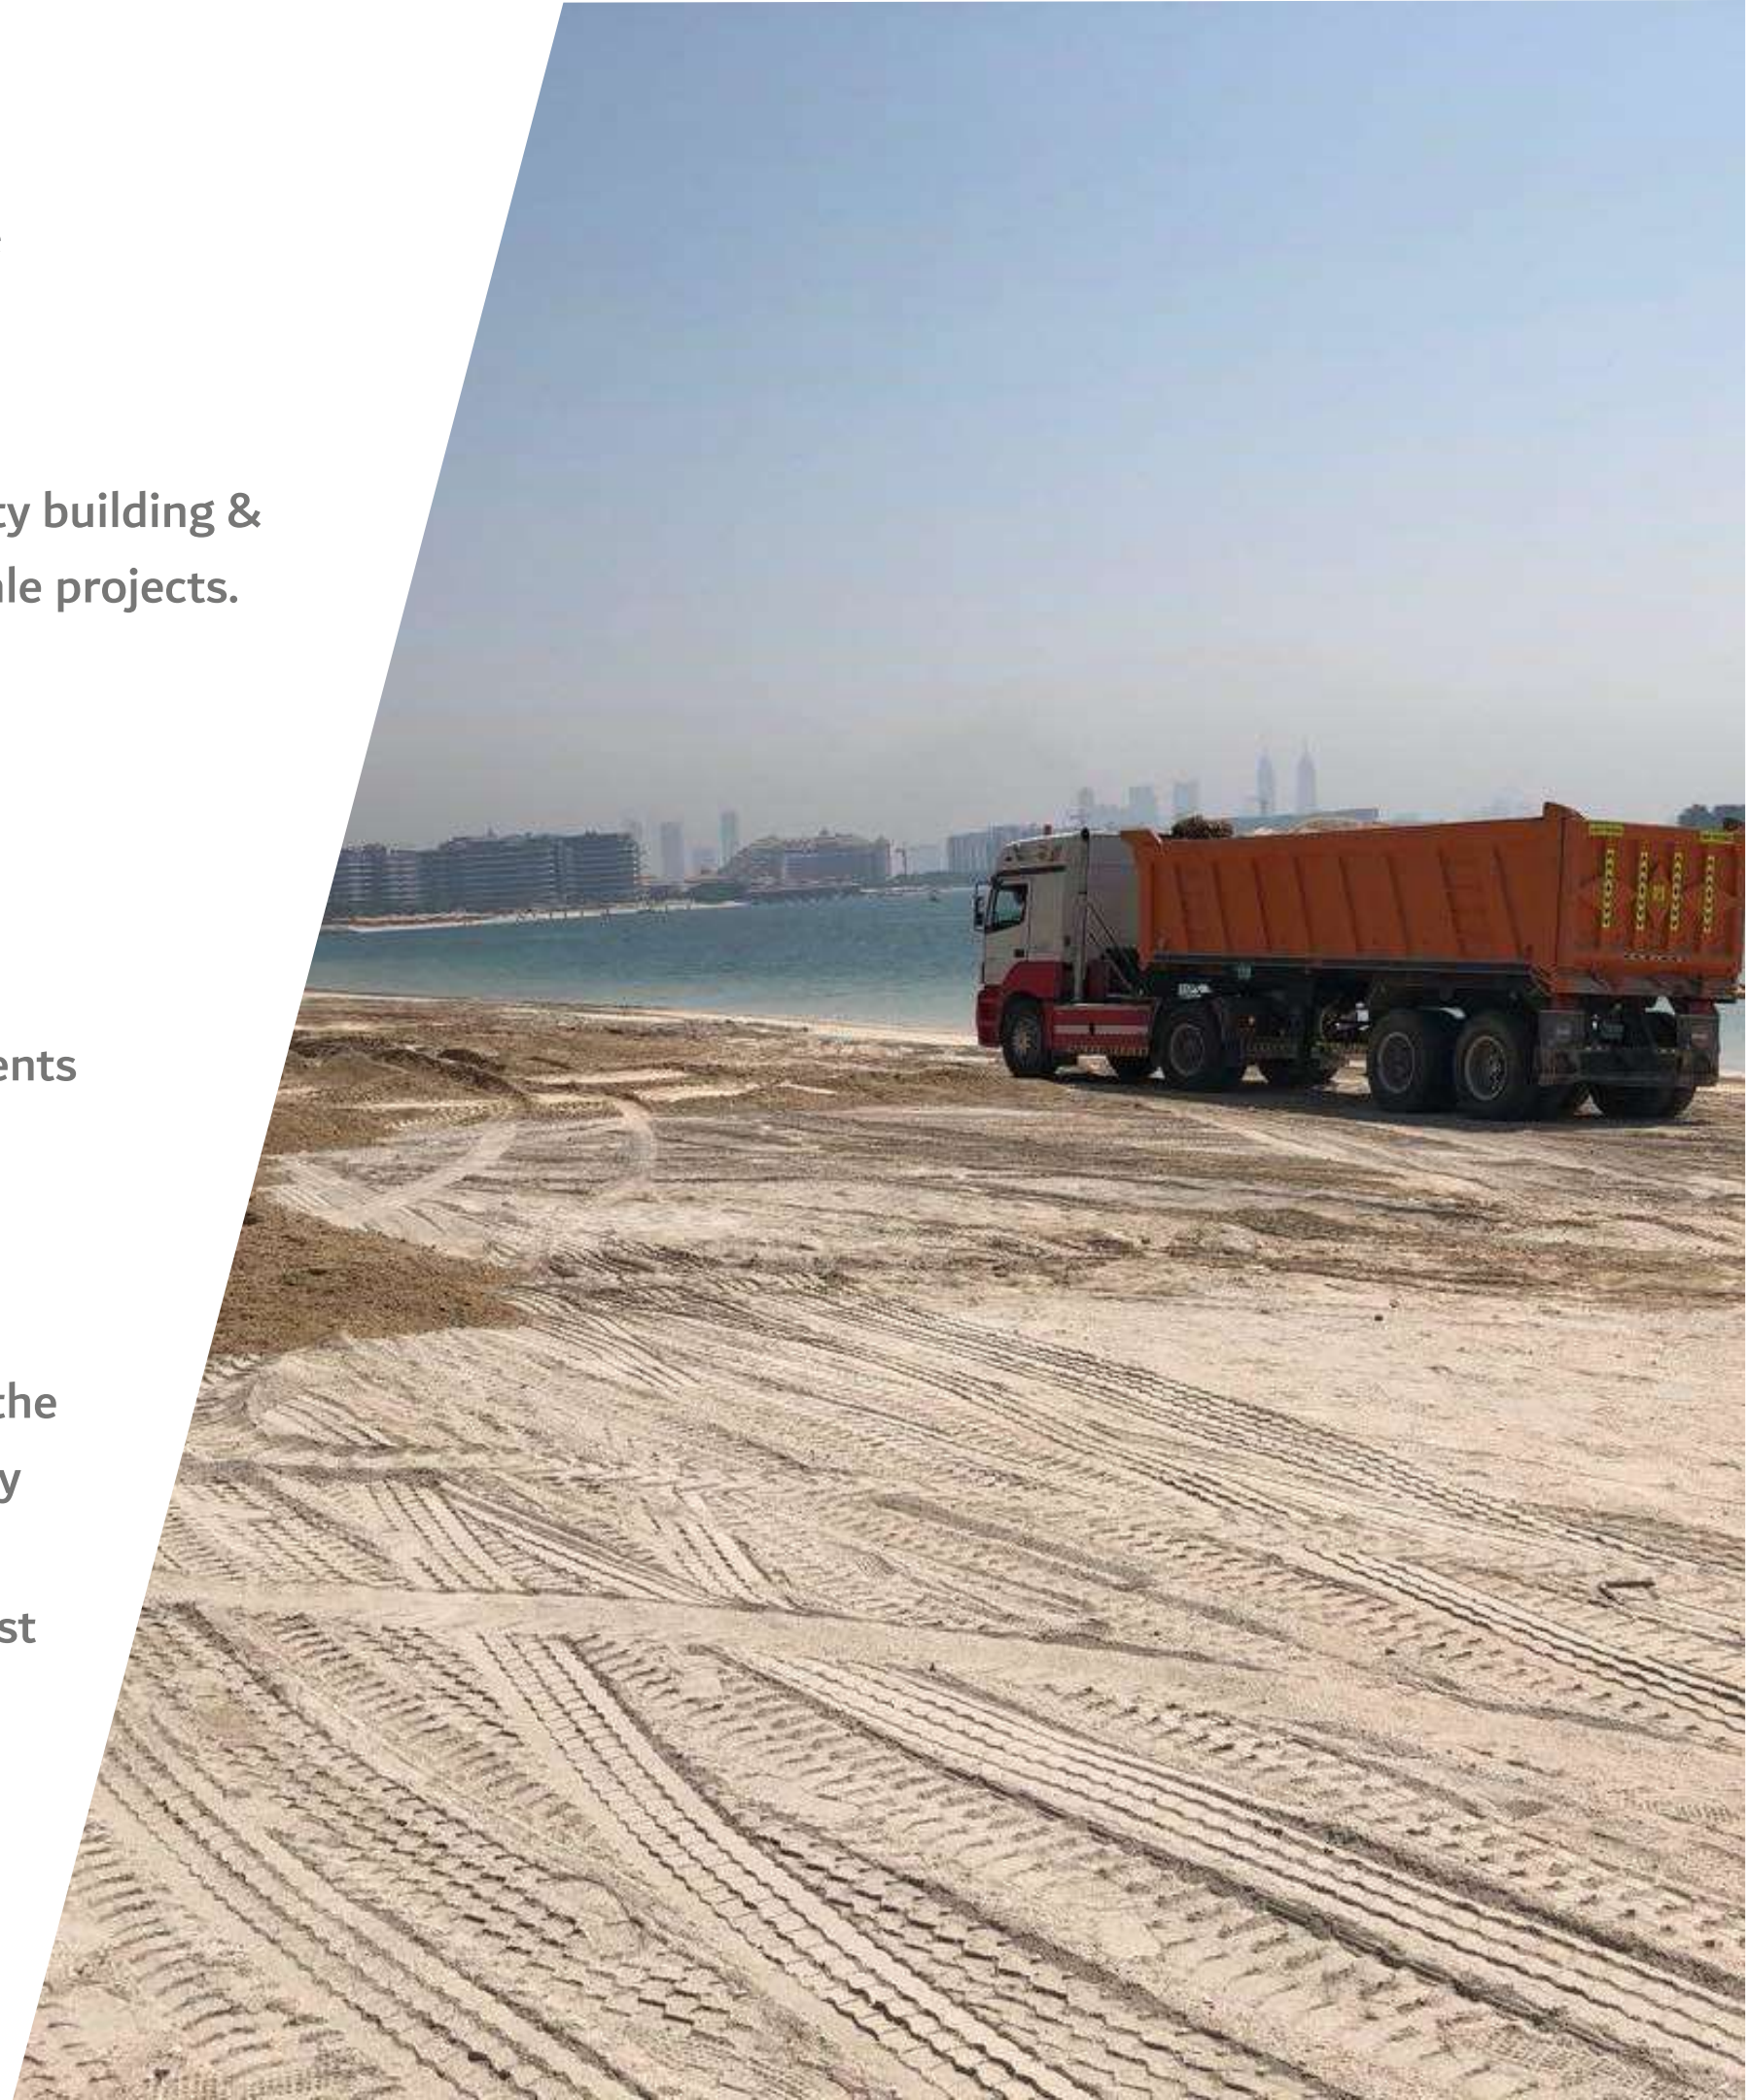

Our vision is to become one of the leading suppliers of building material products in the region. Starting with Dubai and UAE as a home market and expanding rapidly to the other MENA countries in the following years.

Company Profile

BHMK is specialized in supplying high quality building & construction materials for small and large scale projects.

Our team Consists of highly experienced individuals who are determined to deliver our products and services in a way to gain our clients trust and confidence

Our Products are sourced from some of the most well-known manufacturers both globally and locally. We always strive to bring highest quality of products that conforms with highest levels of international standards

Gypsum Powder / Plaster of Paris

BHMK Building materials offers a wide selection of gypsum powder and Plaster of Paris in bulk quantities. Our range of Gypsum powder comes in 3 main packaging:

- 20KG – Marjan white plaster of Paris – Mesh 100
- 25KG – Sadaf white Gypsum Powder / Plaster of Paris – Mesh 100
- 30KG – Sadaf White Gypsum Powder – Mesh 200

Sadaf Gypsum company has been in the regional market for more than 4 decades and is one of the most well-known & respected brands of Gypsum Powder in the GCC, Africa & Indian markets.

Since the year 2014, BHMK exclusively distributes Sadaf Gypsum products in UAE and has been able to attract a large number of contractors and consultants

Notable Projects:

- American University in Dubai
- Reem Community by Emaar - Dubai
- Al Barari Villas - Dubai
- Emirates Palace Hotel – Abu Dhabi
- Kempinski Hotel – Dubai Palm Jumeirah
- The Address Residence Sky View – Downtown Dubai

White Cement & Hydrated Lime

BHMK distributes “ Sadaf “ white cement bags in 50KG packages.

We have the supplying capacity of over 1000 Bags of white cement on a daily basis to Dubai & Sharjah Emirates thanks to our very own shipping and transportation fleet based in Sharjah Industrial Area.

Our range of cement fully complies with the latest ASTM standards.

CEM II / B-L 42.5 N and has a whiteness level of 91.5%

We offer Hydrated lime powder also known in the GCC market as “ Noora” Powder. Our range of Hydrated lime comes in packaging of 20KG bags and complies with highest standards of manufacturing and packaging. Our supplying capacity exceeds 900 bags on daily basis to any location in UAE.

White Sand

**Excavation
Washing
Supply
Transport**

BHMK building materials is one of the market leaders in supplying beach sand also known as “White Sand” or “Washed Sand” in the UAE.

We have full control over all aspects of the supply chain. From excavation to filtration, washing, stocking, supplying and transportation.

BHMK ensures unmatched quality, supplying capacity and pricing for its customers.

We have been able to supply washed sand to various small and large scale projects, from small children play area in a private villa, to a large hotel & resort beach profiling and even an international beach soccer tournament.

Notable Projects:

Crushed Aggregates

Supply | Transport

Aggregate 3/4

Aggregate 3/4 = 20 MM - 30 MM

Aggregate 3/4 is most used in road building, landfilling as well as decorating works in landscaping projects.

Aggregate 3/8

Aggregate 3/8 = 10 MM - 20 MM

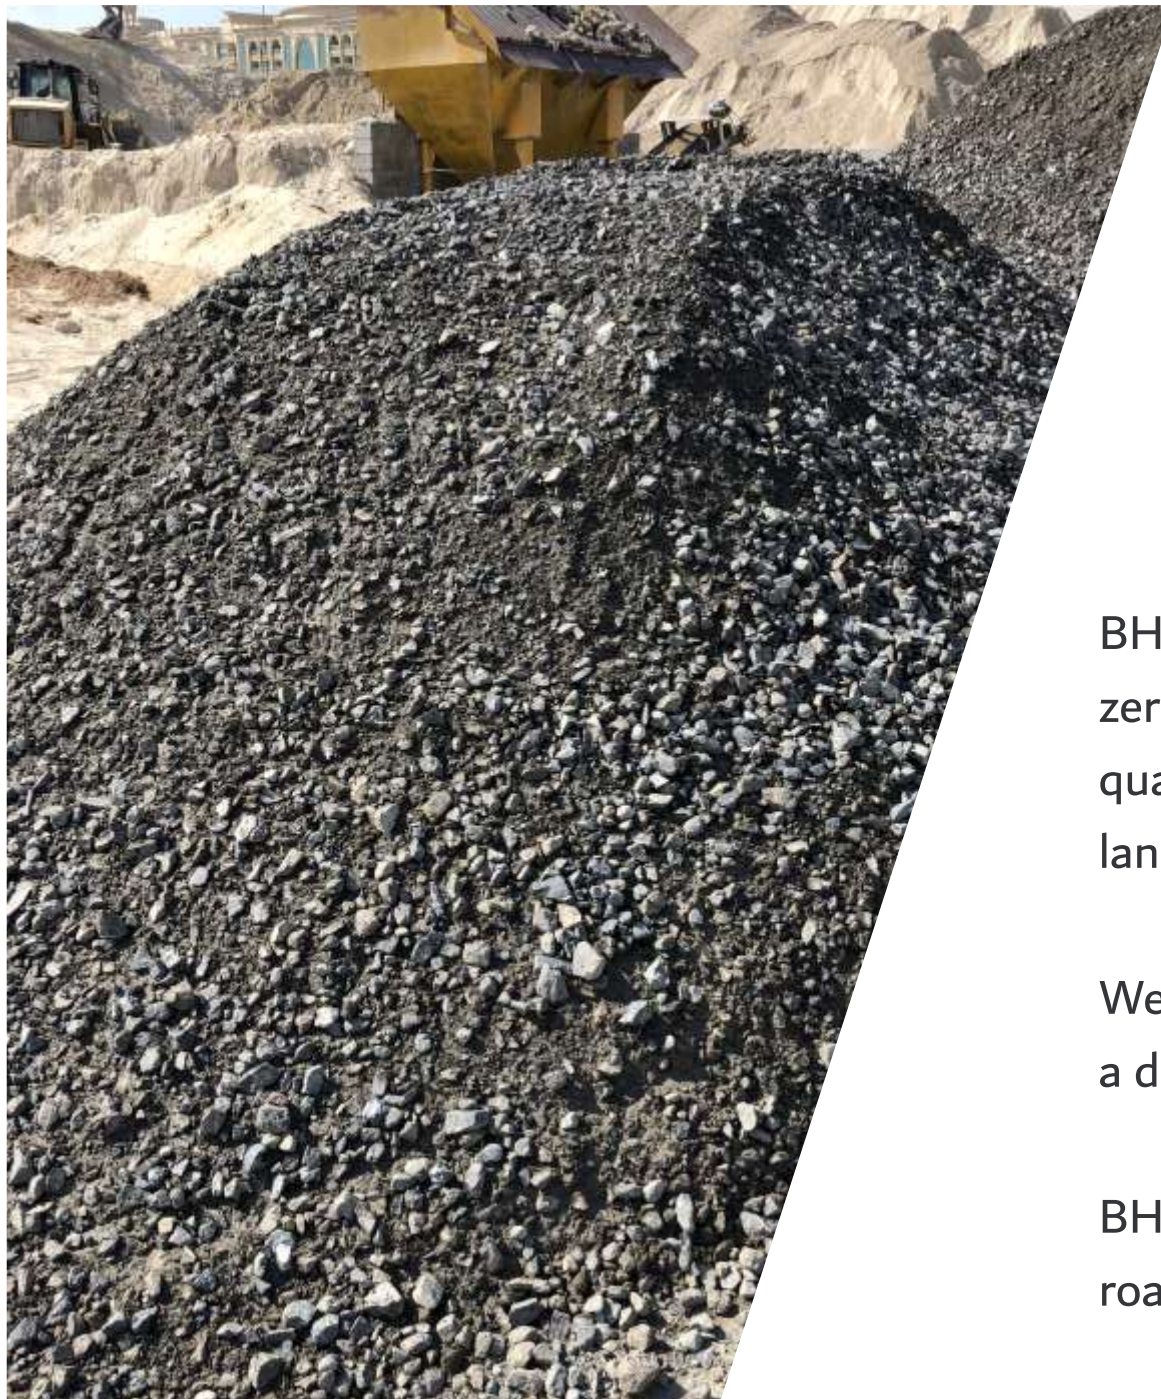

Medium sized aggregate which can be used either alone or as a mix with either aggregate 3/4 or aggregate 3/16 in order to balance the average size of those aggregates.

Aggregate 3/16

Aggregate 3/16 = 05 MM - 10 MM

Aggregate 3/16 It is also known as the interlock sand because it is used as the bedding layer before laying on the interlocks.

Road Base Material

Supply | Transport

BHMK supplies Road Base material is made from crushed aggregate sizes of zero to 40MM mixed with our own high quality sand. The result is a high quality grade 'A' Road base material that is suitable for every road building and land fill compaction works.

We have the capability to handle more than 500 cubic meters of Road Base on a daily basis in our Al Qusais Sand washing division.

BHMK also offers leveling, watering and compaction services for the supplied road base material anywhere in the UAE.

Notable Projects:

Dubai Parks & Resorts – Jebel Ali

Dubai Ship Building Company HQ – Dubai Maritime City

Mohammed Bin Rashid Al Maktoum Solar Park DEWA – Dubai

Huawei International Beach Soccer Competition Parking Area – Dubai

Damac Hills – Dubai

Excavation Services

BHMK Building Materials Offers extensive excavation services for small and large projects within the Emirate of Dubai.

We offer Deep excavation , sand pile shifting as well as leveling, rolling and back filling for the same project.

BHMK currently has the capacity to engage in 5 excavation jobs simultaneously using its heavy equipment division to offer the below services:

- Residential foundation excavations in new subdivisions
- Initial site grading
- Bulk and detailed excavations for commercial sites
- Backfilling
- Compaction
- Final grading

Transport **Fleet**

For fast & Effective Delivery
