Company Overview

BHMK Building Materials started to address the growing demand for high-quality, sustainable construction material products in UAE. With rapid changes in the construction industry environment, changes in the ways of supplying of the materials are also required. Construction materials nowadays should use the highest and latest technologies in their development in order to be sustainable, low-cost and efficient. We have been involved in providing innovative and efficient solutions for beach reclamation and beach profiling works for various hotels and resorts in the UAE.

BHMK have been successful in supplying to a variety of small and large-scale projects, including some of the most iconic constructions in Dubai & Abu Dhabi that regionally and globally are recognized as the gold standard of building development in terms of architectural design, engineering and quality.

Mission

Our mission is to provide the highest quality of services and products with the most competitive prices to our customers. Offering world class customer support and using the fastest and most efficient methods of supply chain solutions to bring products to the hands of our customers.

The core business of BHMK focuses on sourcing and supplying sand & gravel materials as well as Beach renovation services

Vision

Our vision is to become one of the leading suppliers of building material products in the region. Starting with Dubai and UAE as a home market and expanding rapidly to the other MENA countries in the following years.

Company Profile

BHMK is specialized in supplying high quality building & construction materials for small and large-scale projects.

Our team Consists of highly experienced individuals who are determined to deliver our products and services in a way that represents our company culture and values

Our Products are locally sourced, environmentally friendly, and conform with highest levels of standards

White Sand

BHMK building materials is one of the market leaders in supplying beach sand also known as “White Sand” or “Washed Sand” in the UAE.

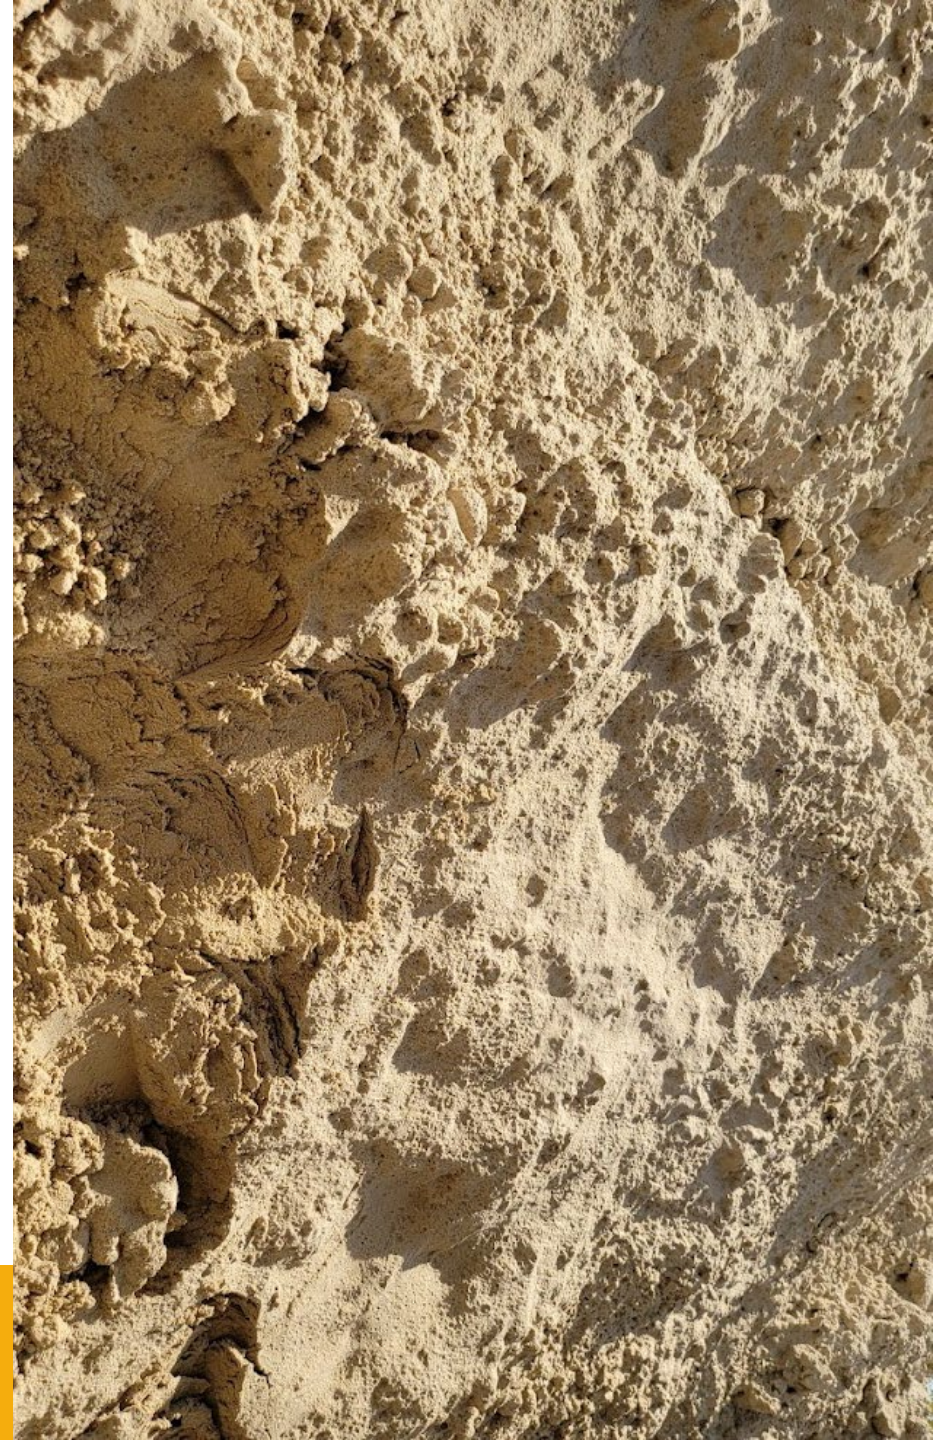

We have full control over all aspects of the supply chain. From excavation to filtration, washing, stocking, supplying and transportation.

BHMK ensures unmatched quality, supplying capacity and pricing for its customers.

We have been able to supply washed sand to projects of various sizes, from small children play area in a private villa, to a large hotel & resort beach profiling and even an international beach soccer tournament.

Notable Projects:

- ☐ FIFA Huawei International Beach Soccer Competitions from 2017 – 2021
- ☐ Retreat Hotel by M Gallery – Dubai Palm Jumeirah
- ☐ Sofitel Hotel & Resort – Dubai Palm Jumeirah
- ☐ Intercontinental Hotel Al Aqah – Fujairah
- ☐ W Hotel the Palm – Dubai
- ☐ Emerald Kempinski Palace – Palm Jumeirah, Dubai
- ☐ Sweden Island – The world Islands – Heart of Europe Project
- ☐ Rotana Hotel & Resort – Abu Dhabi
- ☐ Tilal Al Ghaf Villa project – Dubai

Black Sand – Construction Grade

This type of sand is black in color and is produced by crushers in the mountainsides in the UAE. Black sand is used in different applications mainly in the construction industry.

Black sand is largely used for cement block manufacturing, mixing with OPC black cement as a dry mortar mix, and various other applications in the construction industry.

BLACK SAND IS ONE OF THE MOST USED SANDS IN ANY CONSTRUCTION PROJECT DUE TO ITS VERSATILITY AND COLOR.

We offer a high-quality Grade "A" black sand sourced from quarries based in Fujairah and Ras Al Khaimah.

ADVANTAGES & USES

- ☐ Between Cement Slabs
- ☐ Concrete Mix
- ☐ Under Pavers
- ☐ Artificial Grass
- ☐ Plaster Mix & Mortar Mix
- ☐ Between Concrete Blocks
- ☐ General fill

SIZE

- ☐ 00 – 03 CM
- ☐ Crushed Stone
- ☐ Powder & Solid mix material

00-03 MM
BLACK MORTAR SAND

Red Dune Sand Sweet Soil

Red sand is also known as sweet sand, red dune sand or sweet soil is widely available in UAE mainly in Al Ain and Ras Al Khaimah Emirates.

It is mainly used in the production of interlock tiles or in between interlock pavers, cement blocks, and other cement-based construction products.

Red Dune sand is also the only suitable sand for gardening and landscaping works.

Due to its high fine content, red sand is a soft and light type of sand with high thermal resistivity which makes it suitable to be used as a backfill material for cable laying or underground pipe laying works.

ADVANTAGES & USES

- ☐ **Pavers**
- ☐ **Landscaping & Gardening**
- ☐ **Parks & Green areas**
- ☐ **In between interlock tiles**
- ☐ **Cable laying & Pipe Laying**
- ☐ **General fill / Back-fill**

Road Base & Subbase

Road Base is a blend of Gravel and Fine material which when compacted will form a hard surface with a high level of mechanical strength. Thich can be used as the main layer for laying the groundwork for creating a road.

Our range of road base is of a high quality and is supplied in bulk quantities to any location in the UAE.

**WE OFFER LEVELING, WATERING &
COMPACTION
FOR THE SUPPLIED ROAD BASE**

Uses

- ☐ Sub Layer for Road making
- ☐ Temporary Roadways
- ☐ Land Stabilization
- ☐ Temporary Parking Space
- ☐ Compacted flooring for construction sites/ events.

Size

- ☐ Road Base : 00 – 40 mm
- ☐ 60/40 or 80/20 sand to stone mix ratio

Crushed Aggregate & Gravel

Crushed aggregate is made from crushing the stones derived from the mountains using specific methods and machinery to certain sizes.

Our range of crushed aggregate & gravel are all sourced from Mountain range in RAK, Fujairah and Oman.

Types & Colors

Crushed aggregates and gravels are mainly divided into 2 main types:

- ❑ Gabbro – Grey & Black
- ❑ Limestone – Beige & Off White

These type of gravels are also known as:

- ❖ Ballast Gravel
- ❖ Drainage Gravel
- ❖ Roof Gravel
- ❖ Landscaping Gravel

Size

Crushed gravels comes in wide range of sizes depending on their use case. The main sizes that we supply are as below:

- ❑ 05mm – Aggregate 3/16"
- ❑ 10mm – Aggregate 3/8"
- ❑ 20mm – Aggregate 3/4"
- ❑ 40mm – Aggregate 1/2"

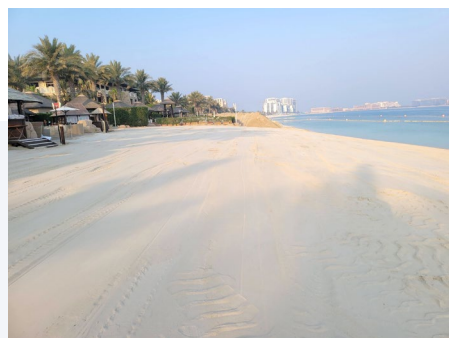

BLUE COAST

MARINE CONTRACTING LLC

BHMK together with its contracting division, BCMC provides below specialized services

EARTH, ROAD, AND MARINE CONTRACTING DIVISON

Beach Profile Design

UAE beaches have high rate of erosion. We provide profile design and implementation works to reclaim back to eroded sand.

Beach Nourishment

Beach areas are prone to debris and rubbish both environmental and from the public use. A fresh batch of high-quality sand is required to nourish the beach back to its original condition

Beach Sports and Venues

We are experienced in creating any beach sport and venue areas. From a field in private land to a large scale internationally broadcasted sporting events, we are capable to deliver a high standard beach venue

EARTH, ROAD, AND MARINE CONTRACTING DIVISION

Excavation / Sand Shifting

We are capable of doing all earth moving works. Our fleet can execute trenching, excavation, dredging, compacting and controlling works within emirate of Dubai and shift the sand to DM approved Dump yard or recycling plant.

Temporary Road Works

As part of our earth works division, we provide high quality road base laying and compacting works for temporary roads, construction sites, public parking or venue areas.

Landscape Works

Our Contracting division can provide a complete landscaping solution from design and CAD drawings to permits and execution.

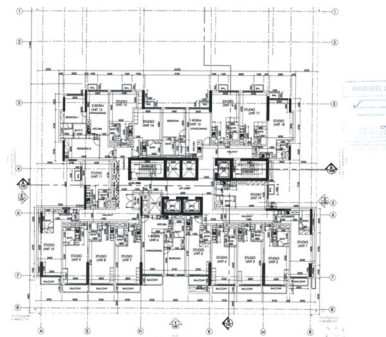

EARTH, ROAD, AND MARINE CONTRACTING DIVISION

Preliminary Design

Producing initial design with efficiency & workability to benefit the investor; as well as use, function & needs of the building to benefit the inhabitants.

Design & AutoCAD Works

Our team of draftsmen and designers will quickly prepare auto cad drawings for all kind of projects at a professional level and prepare your work for submissions.

بلدية دبي
